

Clements Gap Battery Energy Storage System

Works Notification

From 28 October 2024

Major onsite activity will begin to construct the Clements Gap Battery Energy Storage System (BESS).

What we'll be doing

In partnership with Enzen Australia and PSD Energy, Pacific Blue will be mobilising on site as part of the early construction works.

These early works will include earth moving, construction of temporary site offices, and deliveries of materials.

Major onsite activity will continue until construction is complete in late 2025.

Site Mobilisation

Site mobilisation will quickly ramp up from 28 October 2024.

We will be constructing office space, earth works, piling activities, and undertaking heavy lifts.

Impacts and Noise

You may notice increased truck movements and noise during construction of the Clements Gap BESS.

To keep noise impacts to a minimum, construction activity will take place **7.00am to 5.00pm, 6 days a week (Monday to Saturday)**.

For technical purposes, the project requires that a diesel generator be operational 24/7, including on weekends and overnight.

We are aware that the noise from diesel generators may cause a nuisance, and we have selected a model of generator designed specifically to reduce noise impacts.

For security purposes, the construction site requires the installation of sensor lighting that may turn on at nighttime. We have taken steps to ensure this lighting will be directed away from any residences.

The project's Community Relations team may periodically check in with you to monitor how we are managing these impacts.

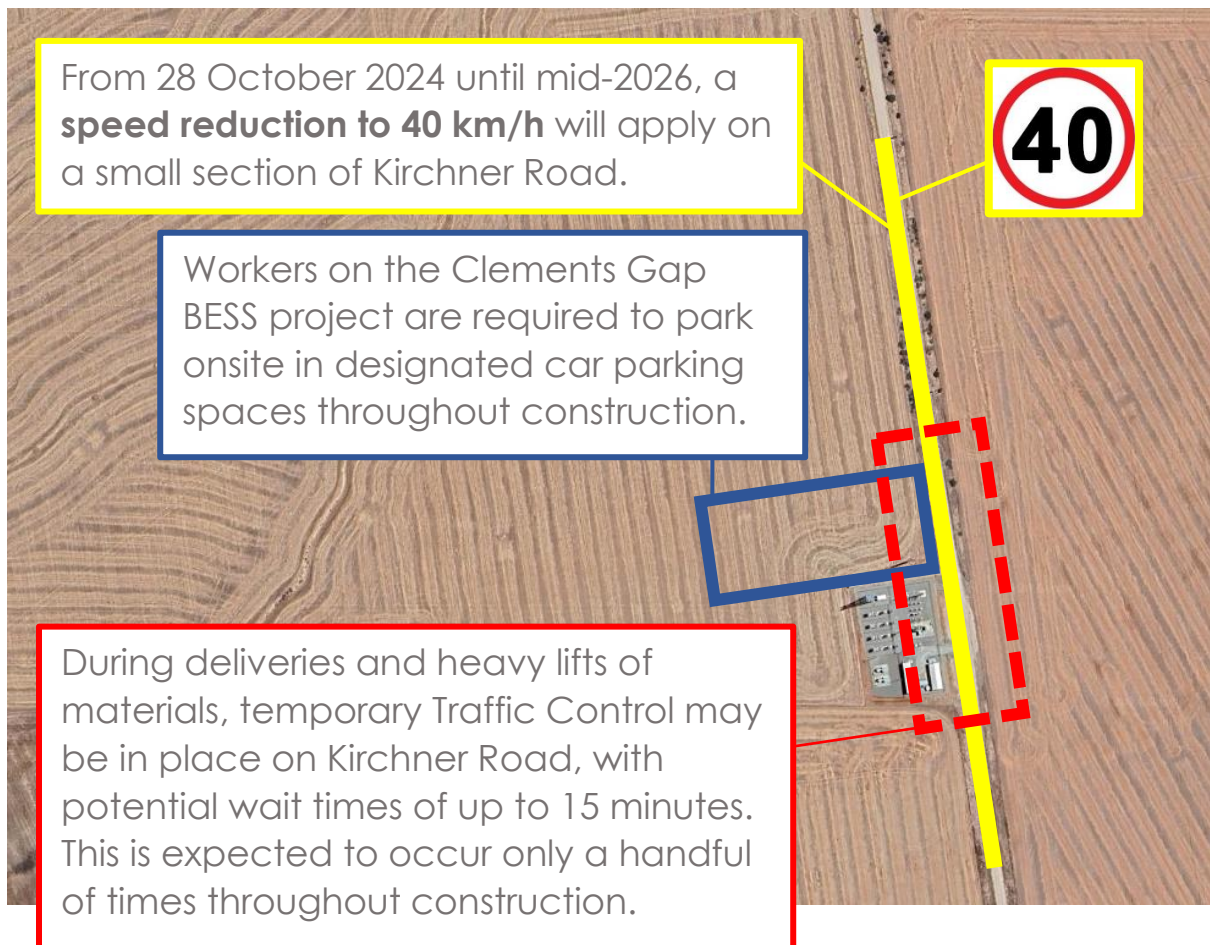

Traffic Management

Throughout the busy harvesting season, and during the period where the project will be receiving a large number of deliveries, Pacific Blue will distribute a weekly email roster of when these heavy loads will be arriving at site.

If you would like to register to receive this weekly email, please contact us.

During the few temporary closures of Kirchner Road, vehicles will be able to detour via Gap Road and Clifford Road.

Council have advised Pacific Blue that they anticipate the upgrade and resheeting works along Kirchner Road will be completed before the end of October 2024.

Pacific Blue understands that we don't always get it right, and we want to be informed when we do not. If you have any feedback, good or bad, please feel free to reach out.

We appreciate our work can be disruptive and thank you for your patience while we build the Clements Gap BESS Project.
